## What is the Nebraska Immunization Registry?

The Nebraska State Immunization Information System (NESIIS) is a secure, statewide, web-based system that has been developed to connect and share immunization information among public clinics, private provider offices, local health departments, schools, hospitals and other healthcare facilities that administer immunizations and provide care to Nebraska residents.

NESIIS simplifies immunization record keeping, provides quicker access to immunization records, and helps you keep track of a patient's immunization status. Once an immunization history has been recorded into NESIIS it is maintained throughout a patient's lifetime.

NESIIS enables users to accurately assess a patient's immunization status. Continuous enrollment of providers, who actively use the registry on an ongoing basis, will ultimately result in readily accessible and complete immunization health records.
