Coalition Partner Details

Great Plains Quality Innovation Network

- Teaming up with Centers for Medicare & Medicaid Services (CMS) to support all Nebraska eligible clinicians (especially those in large practices, health systems and ACO's) at **no charge** to navigate the Quality Payment Program and meet MIPS requirements through **customized technical assistance, including one-on-one assistance when needed**
- Working to improve healthcare delivered across the state with several focus areas including: cardiac and diabetes care, antibiotic stewardship, medication safety, care coordination and immunizations

Telligen

- Quality Payment Program Resource Center under the Small, Underserved and Rural Support (SURS) contract. Our goal is to ensure small practices in Nebraska, Iowa, North Dakota and South Dakota have the information, support and resources necessary to survive and thrive under the Centers for Medicare & Medicaid Services Quality Payment Program.

Nebraska Health Information Initiative

- Connect providers to an online, secure health information exchange to provide continuity of care for patients and comprehensive medication history review for patient safety
- Assist in reporting on Quality, Promoting Interoperability and Improvement Activity measures & attestation of documentation to reporting programs
- Create applications for hospital readmissions/ADT, measure dashboards, provider scorecards & gap reports for population health, care coordination & data-driven quality & performance improvement.

Compass

- Provide technical assistance, tools, data and resources to improve care, reduce costs and meet improvement goals
- Develop competencies to thrive in a value-based reimbursement environment: population health management, data-driven improvement strategies and quality outcome reporting
- Educate and empower clinician teams to be industry-leading practices and facilities, including regional benchmarking, peer-learning networks and in-person learning opportunities

Nebraska Department of Health and Human Services

- The Chronic Disease Prevention & Control (CDPC) Program is funded through two grants from the Centers for Disease Control and Prevention (CDC). The program focuses on working through health systems and communities to reduce complications from multiple chronic diseases such as diabetes, heart disease and stroke. The goal of the program is to make healthy living easier for all Americans.

Centers for Medicare & Medicaid Services (CMS)

CMS supports all eligible clinicians by:

- Quality Payment Program website to learn about the program, explore the measures, and find educational tools and resources
- Quality Payment Program Service Center assists with questions
- Innovations Center's Learning System provides specialized information on APM participation
